

Interactive Seminar „ Languages' learning tricks and methods. Efficient studying of languages.“

1

You will learn to analyse your current language learning process and find effective methods to achieve more quickly personal goals studying a new language.

Through the seminar the solutions will be found to the most popular issues:

- * why the results of learning are not balanced with the studying process;
- * how to keep the motivation of learning;
- * why it is important to notice every success that we make;
- * how to achieve the desired results;
- * how to feel comfortable and confident in the 'real' language environment.

Seminar will be held with interactive methods - individual analyses, group brainstorm and discussions.

As a result of this training you will be able to assess the process of your own language learning and make it more enjoyable and easier.

Additional information:

*Seminar lasts about **4 academical hours with a pause about 20 minutes**. Additional snacks or drinks is needed to keep on the seminar' active thinking environment.
